Lake Forest, IL - In-Office Pathology, LLC (IOP) announced today that its management team has exceeded three million (3,000,000) anatomic pathology tests for lab installations provided since its inception. Using this client base has allowed IOP to benchmark data enabling IOP to compare their lab clients' performance on several important metrics quarterly. No other consultant organization provides this critical utilization data to in-office pathology laboratories.

Pat Kalish, Vice President-Corporate Communications, commented, "This outstanding achievement was accomplished with the help of our local histotech consultants and the 55+ local pathology groups in 23 states where we have provided labs. Only one (1) installation in 10 years demanded to continue services from a reference laboratory pathologist. Local hospital-based pathology groups handled the rest of these millions of tests. Many of these local pathology groups lost this business years ago to national reference lab competitors. IOP is proud to help support local pathology groups in our markets. Noteworthy is that several of IOP's provided labs are also CAP accredited. Pathology is best practiced at the local level."

Ms. Kalish continued, "Our compliant in-office pathology laboratory model continues generating support among GI, urology, multi-specialty practice and dermatology groups nationwide. We have applied our unmatched pathology business experience and expertise to affect a paradigm shift. Our single source approach for lab design, implementation, operations, regulatory guidance, compliance and management oversight is unparalleled in the industry. We are the undisputed market leaders. Specialty groups have responded overwhelmingly to our message. We have 57 installations coast to coast (in 23 states) and the demand continues growing."

Pat commented, "Large specialty practices immediately see the benefits of our compliant, turn-key program. IOP's lab clients have access to reporting, information management and compliant billing capabilities, plus local technical support. IOP's labs facilitate on-site pathology consultations for clinicians and patients, which is an integrated team approach to patient care and much sought after today."

IOP guides specialty physicians in establishing their own compliant in-office pathology laboratories. For more information call 800.280.3785, or email iopath@bex.net visit our website at www.IOPathology.com. We are also on Twitter and Facebook.
