May 20, 2019

Woodstock, GA - In-Office Pathology, LLC (IOP) announced today that it has added ENFD technology to its anatomic pathology business model. For podiatry practices that do not currently enjoy an in-office pathology tissue lab, IOP can now offer a combined ENFD lab in conjunction with a tissue anatomic pathology lab. The space requirements and capital requirements are minimal to add ENFD.

Pat Kalish, VP of Corporate Communications, commented, "We are very proud to have added this new technology to our business model. This technology is helpful in diagnosing the extent of nerve damage in patients with diabetic neuropathy. As an industry first, IOP move yet another test out of esoteric testing was relegated to reference laboratories and move it into the clinician office. Podiatrists can now set this technology up in their practices. The practice will send the prepared slides to our preferred pathology group for diagnostic interpretations (Chestatee Pathology Associates, Atlanta, GA). Chestatee Pathology Associates has Jo Marie Lyons, MD, a double-Boarded Neurologist and Pathologist, reading these cases.

Ms. Kalish continued, "Our compliant in-office laboratory concept continues to generate support among specialty group practices nationwide. We have applied our unmatched laboratory business experience to affect a dramatic paradigm shift. Our single resource approach for laboratory design, implementation, operation/regulatory guidance, compliance and management oversight is unparalleled in the industry. We have installed 88 high complexity in-office laboratories (in 30 states). By adding podiatry to our specialist focus we expect to exceed 100 in-office labs very soon. Our business model is a proven solution to physician income compression."

Pat commented, "Large specialty practices with their IOP in-office laboratories immediately see the benefits of our compliant, turn-key program. IOP laboratory clients have reporting, information management, database analytics, compliant billing capabilities plus local technical support. IOP specialty groups operate at the standard of patient care."

IOP guides specialty physicians in establishing their own compliant in-office pathology laboratories. For further information call us at 800.280.3785. Or, email us at lopathology@gmail.com. Also visit our website at www.iopathology.com.
