Lake Forest, IL - In-Office Pathology, LLC (IOP) announced today that it has signed an agreement with Luminus Pathology Laboratory of Memphis to provide a compliant shared pathology laboratory specialty practices that have not installed in-office pathology labs in the tri-state area.

Pat Kalish, VP of Corporate Communications, commented, "This is our second shared laboratory agreement to date. We realize that pathology is still practiced at the local level. These shared pathology laboratory arrangements allow specialty physicians who might not qualify for their own IOP in-office pathology laboratory to realize a shared laboratory. We have helped them to enter the market for pathology services no matter what the specimen volume. We can also add those practices currently doing TCPC pathology referrals a way to increase their pathology service revenues quickly."

Andre Thompson, MD the founder of Luminus Pathology Laboratory commented, "This is an exciting new and unique model for pathology outsourcing for specialty groups. Installing an office-based pathology lab requires sufficient specimen volume to make that large investment in equipment economically viable. Many practices cannot afford the start up costs. In this model each practice shares the proportionate amount of the lab that they use for their specimen volume. Think time-share for pathology laboratories. IOP has a very successful shared lab in VA for the past 3 years with 5 GI groups. We plan on limiting the number of groups sharing to five (5) total."

Ms. Kalish continued, "Our compliant in-office pathology shared laboratory concept continues to generate support among GI, urology, and dermatology groups nationwide. We have applied our unmatched pathology business experience to affect a dramatic paradigm shift. Our single resource approach for lab design, implementation, operation/regulatory guidance, compliance and oversight is unparalleled in the industry. We are the undisputed market leaders. Specialty groups have responded overwhelmingly to our message. We have 57 in-office laboratories coast to coast (in 22 states) and the demand is growing monthly."

Pat commented, "IOP specialty groups practice at a high standard of patient care and are more productive. They have on-site pathology consultations for clinicians and patients which is not the present situation in pathology today."

IOP installs compliant in-office pathology laboratories. For more information call 800.280.3785, or email iopathology@gmail.com or visit our website at www.IOPathology.com.
